

Enclosed Space Entry

Course developer:

Johan Rindmyr - Marqua AB

System requirements: PC/ Mac with Adobe Flash Player v.9.1 installed and Internet connection.

Estimated time: 2 hour

References: Swedish Work Environment Authority rules AFS 2005:18

Price: 229 €

Overview:

This course is based on the amendment to SOLAS regulation III/19, on emergency training and rescue drills connected to an enclosed space entry. It require crew members with enclosed-space entry or rescue responsibilities to participate in an enclosed space entry and rescue drill at least once every two months.

Learning objectives and learner outcomes:

Those who successfully complete the course should be able to demonstrate sufficient knowledge to be responsible for an enclosed space entry. This knowledge shall include, but is not limited to:

- Knowledge of hazards connected with enclosed spaces
- Testing of atmosphere prior entry
- Control of entry into enclosed spaces
- Knowledge of safeguards for enclosed space entries
- Knowledge of emergency procedures
- Introduction to different types of respiratory protective equipment
- Knowledge of procedures for entry into enclosed spaces with atmosphere known or suspected to be unsafe
- Precautions to be taken when working in enclosed spaces.

Course prerequisites:

The course is open to seafarers who are responsible for enclosed space entries or is in any way involved in enclosed space entries.
