

Securing of Cargo Onboard

**Course developer:**

Sven Sökjer-Petersen, Andrée Falkenberg – MariTerm AB

System requirements: PC/Mac with Adobe Flash Player v.9.1 installed and Internet connection.

Estimated time: 5 hour

Price: 229 €

Overview:

This course is intended to provide the user with a general understanding of the need for and the basic principles of proper cargo securing onboard vessels. The course consists of seven chapters followed by control questions.

Scope:

Securing of cargoes onboard RoRo and General Cargo vessels.

Learning objectives and learner outcomes:

Those who successfully complete the course should have knowledge of:

- The forces acting on cargo at sea
- The potential consequences of cargo shifting
- The strength and proper usage of cargo securing equipment
- Methods for assessing the suitability of cargo securing arrangements

Course prerequisites:

The course is open to all seafarers and to those working ashore in the shipping industry.
